Igor Gvozdić

Java & Android developer

Objective

My primary goal is to get a job where I would have an opportunity to learn and further expand my knowledge.

Skills

Core Java
Java EE
Android
HTML
CSS
Maven
Git/Github
WildFly
A bit of JS
A bit of SQL

About Me

I am a self-taught Java developer. I first started learning Android about a year and a half ago, but then I realized that I first have to learn Java properly. Since then, I 've been learning Java alongside Android from various internet resources. In order to expand my knowledge and improve my chances of getting a job, I started Java EE course at Cubes School. I speak English and Italian and currently I am learning German. If you have any question, don't hesitate to contact me.

Education

March 2018 - Present   Cubes School

Java Enterprise Edition
- Core Java, Servlets, Jpa, EJB, REST, SOAP, JSP, JSF.

Jan 2017 - Present   Internet

Complete Java Masterclass -
