Skills

Core Java
Java EE
Android
TestNG/Robot
HTML
CSS
SQL
Maven
Gradle
Design Patterns
Git
WildFly
Apache Tomcat
Selenium
IntelliJ/Android Studio/Eclipse/
SOAPUi/Postman
Jenkins
A bit of JS
JIRA

About Me

Hi, my name is Igor and I'm a QA automation engineer. My passion for programming happened by accident while I was trying to build a web page for fun. After that, I got interested in Java and especially Android but then I realized that I have to go back to CS basics so I read a few books and watched a couple of courses about programming fundamentals. From then on I tried to write my first fully functional Java EE and Android apps. The knowledge that I gained during this process got me my first IT job and now I'm perfecting my skills as a QA Engineer. I'm always on the lookout to learn something new, so at the moment I'm learning Spring Boot and Selenium. I speak English and Italian and trying to learn German (without much success).

Work experience   Jan 2019 -

- QA Automation Engineer   Allied testing

- Creating tests for web services (REST, SOAP) using TestNG (Java), Robot (Python) frameworks.
- Regression, functional, smoke and some frontend testing.
- Defect tracking using Jira.
- Writing test documentation.

Projects

-News Articles, using Java EE (JPA, EJB, REST, SOAP, JSF);
-Movie Ratings, using Android (Fragments, Retrofit, Jetpack).
-WeatherApp, using Android

Jan 2017 - Present   Internet

Most notable courses:

Java Enterprise Edition 8
https://www.udemy.com/java-enterprise-edition-8/

Complete Java Masterclass -
https://www.udemy.com/java-the-complete-java-developer-course/

The Complete Android + Java Developer Course™ -
https://www.udemy.com/java-android-complete-guide/

2006-2012   Belgrade University

I hold a masters degree in non IT related field.
